

Salama Hani EL Ejlaa

React Frontend Developer

salamhani697@gmail.com |  [LinkedIn](#) |  [GitHub](#) 

Professional Summary

Experienced React Frontend Developer with 5+ years of building performant and scalable web applications. Skilled in integrating React applications with headless CMS platforms such as Adobe Experience Manager (AEM) through REST and GraphQL APIs. Passionate about delivering responsive, accessible, and optimized user interfaces while collaborating effectively in Agile teams

Skills

React.js, JavaScript (ES6+), HTML5, CSS3, SASS/LESS

Adobe Experience Manager (AEM) integration

RESTful APIs, GraphQL

Git, Bitbucket, CI/CD pipelines

Agile / Scrum methodologies

Web performance optimization, Cross-browser compatibility

Tailwind CSS, UI Design

React Router, Redux Toolkit

(TanStack Query (React Query

TypeScript, Next.js

Work Experience

Frontend Developer

2022 – 2025

Developed responsive React components integrated with AEM content via REST and GraphQL APIs •

Collaborated with backend developers, designers, and QA teams to ensure high-quality user experiences •

Optimized frontend code for performance and scalability •

Participated actively in Agile ceremonies including sprint planning and retrospectives •

Junior Frontend Developer

2020 – 2025

Supported React-based frontend development and API integration •

Assisted in testing and bug fixing to improve site reliability and usability •

Improved site responsiveness and accessibility compliance •

Education

Bachelor of Science in Computer Science

Al-Azhar University – Gaza, Palestine

Graduation Year: 2025

Projects

E-commerce Shopping Platform .1

Developed a responsive admin dashboard for managing an e-commerce shopping platform using React and REST APIs. Implemented dynamic charts, order management, and user analytics with a strong focus on performance and usability

Content Asset Management (CAM) System .2

Built a React frontend integrated with Adobe Experience Manager (AEM) to manage digital assets efficiently. Leveraged GraphQL APIs to fetch and display content fragments and enable real-time updates

Dashboard System .3

Developed responsive dashboard systems using React to manage various business operations, including data visualization, user management, and real-time updates. Integrated REST and GraphQL APIs for backend communication, optimizing for performance and scalability
